Lame Bioclimatique®

TRADEMARK & DESIGN REGISTRATED

A Geplast Building innovation

ALU

PVC

ADVANTGES

◆ Solar gain management

Control of solar gain with **4 times more light and ventilation** in the home than a standard slat for optimal comfort in summer.

Exceptional visibility toward outside in the open position.

Regular micro-punching diffusing a soft and soothing light within the living rooms.

◆ New functionalities

Safety functions and total opacity in the closed position for optimum sleeping comfort thanks to the development of our rubber seals integrated into our sliders.

Improved acoustic comfort when raising / lowering the apron.

Integrated insect screen and blind functions.

Available in PVC or aluminium.

◆ Easy to implement

Manufacture and installation identical to a standard slat.

Ideal for large widths bay.

AVAILABLE COLOURS

Lame Bioclimatique® & final slat

Please contact us to discover the other colors.

REGISTERED TRADEMARK AND MODEL

The shape and aesthetics of Lame Bioclimatique® are protected at European level by the European Union Intellectual Property Office (EUIPO).

Lame Bioclimatique® is a trademark of Geplast Building and is registered with the Institut National de la Propriété Industrielle (INPI).

LIGHT TRANSMISSION

Normal / hemispheric light transmission factor :
 $T_v^{nh} = 3\%$ (PV CSTB)

The bioclimatic slat, in the openwork position, is comparable to a awning fabric or ZIP blind in terms of light comfort and provides excellent glare control.

Solar radiation transmittance inside the building, roller shutter closed		
Light colours (white, light grey...)	(L* ≥82)	Sws = 0,05
Dark colours (brown, black, ...)	(L* ≤82)	Sws = 0,10

AIR PERMEABILITY

The bioclimatic slat allows an airflow (over-ventilation that allows the air in the house to be cooled):

Qa = 939m³/h per m² of deck (PV CSTB)

CORROSION RESISTANT

New, more corrosion-resistant ALU strip.
Salt spray test (PV CSTB).

REFERENCES AND PACK SIZE

■ The apron must be tested vertically upwards and downwards before being installed on the customer's premises.

Lame Bioclimatique®

ALU

NEW

New 0.30mm strip, achieved with 99.5% recycled aluminium & more resistant to corrosion.
New high density foam 115Kg/m³ for exceptional rigidity

VR040AJ_AL

Bioclimatic slat ALU openwork roller shutter 15 x 8,7mm
65 bars of 6 ml / pack or 5 trays of 13 slides

PVC

VR040AJ

Bioclimatic slat ALU openwork roller shutter 15 x 8.7 mm
65 bars of 6 ml / pack or 5 trays of 13 slides
1950 bars of 6 ml / container or 150 trays of 13 slides

Nominal thickness	8,7 mm
Working height	15 mm
Number of slats / m	67
Weight	5 Kg/m ²
Max width	3 m
Max surface area	7 m ²
Standard length	6 m

Nominal thickness	8,7 mm
Working height	15 mm
Number of slats / m	67
Weight	5 Kg/m ²
Max width	1,6 m
Max surface area	3 m ²
Standard length	6 m

Final slat

VR081F_AL

Final slat 49 x 8,5 mm
10 bars of 6 ml / pack

LACQUERED COLORS IN STOCK

Gross + other colours available, similar to those of Bioclimatic slat from 60ml upwards

Installation

FoKus 235 box
Timber frame assembly
ALU bioclimatic slat
nthracite grey 7016

WINDING DIAMETERS IN BOXES

	Maximum number of slats	Maximum height under box	Maximum winding Ø
IrYs	164	2450	Ø 200
FoKus 235	180	2700	Ø 200
FoKus 205	130	1950	Ø 180
FoKus 168	90	1350	Ø 145
GVR.e	150	2250	Ø 185
GVR.dL	150	2250	Ø 185
Reno City	100	1500	Ø 170
GVR.r	103	1550	Ø 160

The heights under the box are given as an indication and must be verified by tests in situ at the assembler's.

Rails and rubber seals

■ It is imperative to use the PVC/ALU guides, rubber seals and end slats without which GEPLAST declines all responsibility.

Designed and extruded in ABS and soft PVC for better resistance to heat and shrinkage, our rubber seals can be integrated with Geplast's PVC or ALU guiderails as well as with traditional and renovation guiderails on the market.

With Geplast ALU guide :

AC101_N0004
Black rubber seals
5,3 x 5,4 mm
50 bars of 6 ml / pack

Mounting plan on ALU runner

With Geplast PVC guide :

AC102_N0004
Black rubber seals
6,7 x 5,4 mm
50 bars of 6 ml / pack

Mounting plan on PVC runner

With traditional ALU guiderails and market renovations :

AC191_N0004
Black rubber seals
5 x 4,7 mm
50 bars of 6 ml / pack

AC100_N0004
Black rubber seals
5 x 4,9 mm
50 bars of 6 ml / pack

AC103_N0004
Black rubber seals
5 x 5,1 mm
50 bars of 6 ml / pack

AC117_N0004
Black rubber seals
6,7 x 5,1 mm
50 bars of 6 ml / pack

AC118_N0004
Black rubber seals
6,7 x 4,7 mm
50 bars of 6 ml / pack

AC119_N0004
Black rubber seals
6,7 x 6 mm
50 bars of 6 ml / pack

ALU

Assembly of the rubber seal on PVC guiderail

NB : the bioclimatic slat is used with the PVC guide and the coextruded joint : **JC10**

In accordance with FFB guidelines, roller shutters, when deployed, can sometimes present a wavy appearance. This phenomenon is accentuated for large products. Find out more about the Quality Assessment Guide for roller shutters, available and downloadable from the websites : www.geplast.fr and www.groupeement-actibaie.org.

SPECIFIC MACHINES

Geplast has set up a partnership with manufacturers of machines and roller shutter end caps. These end caps, to be placed at the edges of the slats, offer many advantages :

- ◆ Reduced manufacturing time
- ◆ Easier to roll up the apron
- ◆ Keeping the slats in place against translation
- ◆ Anti-noise and anti-friction clamping system

Machine for cutting and assembling aluminium roller shutter apron

Manual stapler

Automatic stapler

END CAP FOR 15 MM BIOCLIMATIC SLAT

AC079
10 000 pieces/box

The end cap is attached to the left and right ends of the PVC and ALU slats. Its role is to stop the horizontal translation of the slats in order to guarantee an optimal operation of the bioclimatic roller shutter.

COMPARISON ROLLER SHUTTER SLATS

VIDÉO
BIOCLIMATIC SLAT

STRANDARD ROLLER
SHUTTER SLATS

LAME BIOCLIMATIQUE®

"Classic" blade
43 mm

0.8 x 12mm openings
312mm² for 1m of slats
22 openwork slats for 1m height
=
6,900mm² for 1m²,
0.7 % of openings

"Micro-perforated" blade
43 mm

Holes 1.5mm diameter
588mm² for 1m slats
22 openwork slats for 1m height
=
12 900mm² for 1m²,
1.3 % of openings

Lame Bioclimatique®
15 mm

Holes 1.5mm diameter
588mm² for 1m of slats
52 openwork slats for 1m height
=
30 600mm² for 1m²,
3% openings

$3/0,7 = 4,3$
Bioclimatique slat therefore has 4x more light and air than a «conventional» blade.
Normal/hemispherical light transmission factor hemispherical: $T_{vnh} = 3\%$ (PV CSTB)

RE 2020
RÈGLEMENTATION ENVIRONNEMENTALE

ALU SLAT FORMING MACHINE

"This integration will enabled us to acquire new technical skills in-house and to fully control the production of our bioclimatic slat.

Made from 99,5% recycled aluminium strip, the Lame Bioclimatique® is part of a "responsible" approach. It enables us to meet the challenges of the RE2020, which now requires the control of ventilation and solar gain within homes".
